

1. Give various differences between Infrastructure network and Ad-hoc network.
2. Compare LTE and LTE-Advanced.
3. Explain different multiplexing techniques in detail.
4. Explain the concept of frequency reuse with clustering.
5. Illustrate how EIR and HLR entities function in GSM network.
6. Explain different components used in LTE architecture with diagram.
7. Explain Indirect TCP and Mobile TCP in detail.
8. Explain the need for micro mobility and describe Cellular IP and HMIPv6.
9. Draw a neat sketch of Bluetooth protocol stack and explain.
10. Explain UTRAN architecture in detail.
11. Explain protocol architecture of IEEE 802.11 with diagram.
12. Explain various types of antennas along with their radiation pattern.
13. Explain optimization in detail.
14. Discuss in detail Wi-Fi security protocols.
