

AES vs DES Comparison Table

Feature	AES (Advanced Encryption Standard)	DES (Data Encryption Standard)
Full Name	Advanced Encryption Standard	Data Encryption Standard
Created	2001	1977
Key Length	128, 192, or 256 bits	56 bits
Block Size	128 bits	64 bits
Orientation	Byte-oriented	Bit-oriented
Structure	Substitution-Permutation Network	Feistel Network
Rounds	10, 12, or 14 (based on key length)	16 rounds of identical operations
Security	High (De facto world standard)	Weak (Broken easily)
Speed	Faster than DES	Slower than AES

Flexibility	Flexible	Not flexible
Efficiency	Efficient in both hardware and software	Efficient only in hardware
Designers	Vincent Rijmen and Joan Daemen	IBM
Derived From	Aside-channel square cipher	Lucifer cipher
